

University of Kansas School of Nursing
Grid for Plotting Coursework with Master's Program Objectives, Leadership Specialties
For Students Admitted Prior to Spring 2013

Objectives	1	2	3	4	5	6	7
Please insert the listing of courses from your program of study. <i>(Example shown is from the FNP program of study.)</i>	Synthesize advanced knowledge of concepts, theories, principles and research from nursing, the liberal arts and the natural and behavioral sciences as it relates to a specialized area of nursing.	Apply nursing therapeutics based on standards of practice to meet the health care needs of client systems in relation to changes in their internal and external environments.	Integrate ethical, legal, economic and cultural considerations and personal, professional and client system values in the application of the art and science of nursing.	Demonstrate professional values in advanced nursing roles.	Collaborate with colleagues in nursing and other disciplines to meet the health needs of client systems in varied health care delivery systems.	Generate research questions from theory and practice and evaluate research findings for use in nursing.	Influence health policy and the delivery of health care that is responsive to societal trends and to changing client system needs by evaluating and proposing alternatives.
